

## Pulp Clamps

Pulp Clamps - There is a wide range of lift truck accessories available in order to make the devices much more useful. A snowplow accessory could be mounted to the front part of the forklift. A scoop bucket could be helpful if the job requires moving sand, gravel, soil or snow. A double block handler permits the forklift operator to lift\carry a couple of loads and afterward pile them side-by-side. Many of these attachments are considered great for light to medium tasks.

One more forklift accessory is the package lift clamp, that could lift and move really heavy pallets. Furthermore, pallet crane forks could be utilized in order to lift and move pallets with an overhead crane. A drum clamp attachment is helpful for transferring heavy drums from place to place without having to utilize a pallet. Forklift mounted hoppers permit material to be moved and dumped without having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are also accessories available which could transform the lift truck right into a commercial broom or mop. Such accessories are perfect for cleaning boat docks, warehouse flooring and parking areas. Lift truck mounted platforms come outfitted with twin entry doors and could be connected so as to move staff from one site to another. The mounted platform accessory is ideal for reaching parts that are difficult to access, especially if you have merchandise or stuff stored in out of the way areas or really up high.

Attachments could be a really useful piece of equipment when put in a forklift, transforming a regular forklift right into a mobile crane unit. It is most helpful when moving unsteady or awkward loads. This attachment can either be telescopic, mounted on the carriage itself, or be connected or lift truck mounted.
